

# IT OUTAGES ARE A BUSINESS RISK

Sovereign IT strategies for resilience, data protection  
and business continuity.

## THE BIGGEST RISK TO BUSINESS: LOSING CONTROL

An operational outage is far more than a technical issue:  
When systems or data go down, business operations are immediately at risk.  
Revenue, trust, and operational capability are on the line.

### \$100,000 IN LOSSES PER HOUR

According to a study by ITIC, 98% of companies incur losses of more than \$100,000 per hour during an IT outage.

### SERIOUS LONG-TERM IMPACT

After a security incident, companies face a 70% risk of losing customers.

### THE “CLOUD ACT”: A LEGAL RISK

US legislation can require US-based providers to hand over data to government authorities — creating significant challenges for GDPR compliance and data sovereignty.

## THAT'S WHY BUSINESS CONTINUITY IS A C-LEVEL PRIORITY

A sovereign workplace solution helps organisations stay operational during outages, reduce risk, and protect business continuity — even in critical scenarios.

Workspace by STACKIT keeps your organisation operational with full data control, European sovereignty and GDPR compliance.

# THE NEW WAY TO WORK WITH DIGITAL SOVEREIGNTY

Workspace by STACKIT combines the productivity of Google Workspace with the sovereignty of STACKIT in one digital workplace solution.

Client-side encryption

Browser-based real-time collaboration

Open-source-based emergency operations

No access by foreign authorities

Local data storage in Germany

## CONTROL & SOVEREIGNTY

With Client-Side Encryption (CSE), sensitive data is encrypted directly on the user's device. Because the encryption keys are stored exclusively within the STACKIT infrastructure, neither Google nor the platform operator can access the data.

# WHY WORKSPACE BY STACKIT?

## PRODUCTIVITY

Browser-based real-time collaboration and Gemini AI help speed up workflows and make teamwork more efficient across the organisation.

## SOVEREIGNTY IN A CRISIS

IT outages cannot always be prevented, but an operational standstill can. With optional emergency operations mode, your organisation stays operational when others cannot.

# READY FOR A SOVEREIGN WORK ENVIRONMENT THAT DRIVES PRODUCTIVITY?
